

**Provided Hardware:**

Replacement Cables

**Suggested Hardware:**

Replacement Zipties

**Suggested Tools:**

Wire Cutter

Small Phillips Screwdriver

**Assembly:**

- 1** Begin by unplugging your station and placing it upside-down on a flat surface.

- 2** Remove the 4 Phillips head screws from the bottom.

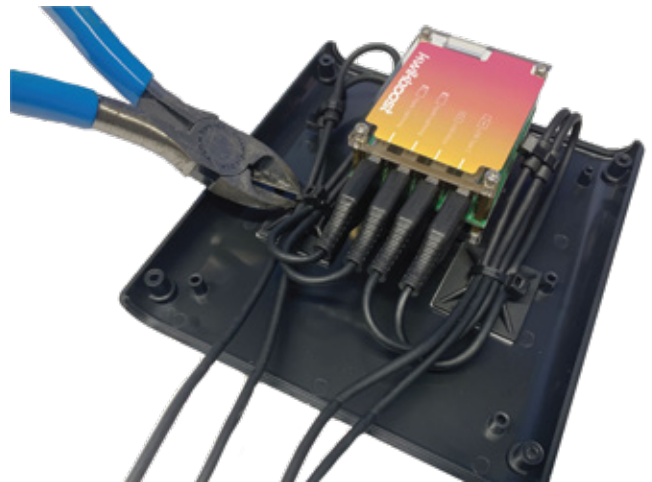

**Assembly Continued:**

- 3** The enclosure comes apart into 4 pieces. Place the main piece with the circuit board on a flat surface.

- 4** Locate the 2 ziptie pads that secure the cables. Cut them and remove the current charging cables.

- 5** Replace cables in correct order, re-secure new cables with new zipties and reconstruct the station. Replace the 4 screws making sure that each enclosure piece has no gaps.
